Portfolio

TECHNICAL SKILLS

Programming
- Python
- Java
- C

Web Development
- HTML5, CSS3
- JavaScript / jQuery
- Bootstrap

Backend Frameworks
- Flask
- Django

Databases
- SQL

Core CS
- Data Structures & Algorithms
- Object-Oriented Programming

AI / ML
- Machine Learning Foundations
- Statistical Modeling

Tools & Platforms
- Git
- Linux / System Administration

UI / UX
- Responsive Design
- UI Design Principles

SOFT SKILLS

- Analytical Thinking
- Collaborative Teamwork
- Adaptability
- Technical Communication

EDUCATION

B.Tech — Computer Science
(Data Science)
BITS, Warangal
July 2024 — Present

ABOUT ME

Computer Science undergraduate (Data Science) with hands-on experience building full-stack web applications and AI-powered systems. Proficient in Python, Java, JavaScript, Flask/Django. Proven ability to deliver projects from concept to deployment, with strong foundations in Artificial Intelligence & Machine Learning and growing expertise in backend security. Passionate about writing clean, efficient, and scalable code.

PROJECTS

AI Face Recognition Attendance System 2025 GitHub →

Automated employee attendance using computer vision and face recognition.

- Built an end-to-end AI pipeline using OpenCV and face_recognition library for real-time detection
- Automated attendance logging to CSV/database, eliminating manual entry errors
- Designed an intuitive admin dashboard to view, filter, and export attendance records

CivicResponse — Civic Issue Reporting Platform 2025 GitHub →

Crowdsourced web platform to report and track civic infrastructure issues.

- Built a mobile-responsive interface for reporting potholes, streetlights, and drainage issues
- Implemented issue categorization, location tagging, and real-time status updates
- Focused on accessibility and usability across all device sizes
- Planned backend integration: database, authentication, and analytics

Personal Portfolio Website 2025 GitHub → | Live Server

Responsive personal portfolio showcasing projects, skills, and experience.

- Designed and built from scratch with a fully responsive layout and dark/light theme toggle
- Structured sections for About, Projects, Skills, and Education timeline
- Deployed on GitHub Pages; gained hands-on experience with CSS Flexbox and Git workflows

Fee Management System 2026 GitHub →

Comprehensive web application for managing and tracking student fees.

- Developed CRUD operations for fee records with secure admin authentication
- Implemented payment tracking, due-date alerts, and downloadable receipts
- Used Python (Flask) backend with SQL database for data persistence

CERTIFICATIONS

- **Python — Full-Stack Virtual Internship** — Industry Internship Program
- **CodSoft AI Internship** — CodSoft
- **Artificial Intelligence Foundations: Machine Learning** — LinkedIn Learning
- **Machine Learning: Statistical Foundations** — Wolfram Research
- **Frontend Web Designing (HTML5, CSS3 & UI/UX)** — freeCodeCamp
- **C Programming Language** — Codetantra
