ABOUT ME

Computer Science undergraduate (Data Science) with practical experience in Python-based web development and REST API design. Skilled in Python, Java, C, JavaScript, Flask, and FastAPI. Strong interest in AI/ML and software engineering, with a track record of building projects that demonstrate problem-solving, backend development, and database management skills.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, Javascript
- **Web Development:** HTML5, CSS3, JavaScript, jQuery, Bootstrap
- **Backend Frameworks:** FastAPI, Flask
- **Databases:** SQL
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming
- **AI/ML:** Machine Learning Foundations, Statistical Modeling, OpenCV
- **Tools & Platforms:** Git, Linux Terminal, GitHub
- **UI/UX:** Responsive Design, UI Design Principles

SOFT SKILLS

- Analytical Thinking
- Collaborative Teamwork
- Adaptability
- Technical Communication
- Problem - Solving

EDUCATION

B.Tech - Computer Science (Data Science) | BITS, Warangal | July 2024 – Present

PROJECTS & EXPERIENCE

CivicResponse - Civic Issue Reporting Platform (2025) [GitHub](#)

Crowdsourced web platform to report and track civic infrastructure issues.

- Built mobile-responsive interface for reporting potholes, streetlights, and drainage issues
- Implemented issue categorization, location tagging, and real-time status updates
- Focused on accessibility and usability across all device sizes
- Planned backend integration: database, authentication, and analytics

Personal Portfolio Website (2025) [GitHub](#) | [Live Server](#)

Responsive personal portfolio showcasing projects, skills, and experience.

- Designed and built from scratch with fully responsive layout and dark/light theme toggle
- Structured sections for About, Projects, Skills, and Education timeline
- Deployed on GitHub Pages with hands-on experience in CSS Flexbox and Git workflows

AI Face Recognition Attendance System (2025) [GitHub](#)

Automated employee attendance using computer vision and face recognition.

- Built end-to-end AI pipeline using OpenCV and face_recognition library for real-time detection
- Automated attendance logging to CSV/database, eliminating manual entry errors
- Designed intuitive admin dashboard to view, filter, and export attendance records

Fee Management System (2026) [GitHub](#)

Comprehensive web application for managing and tracking student fees.

- Developed CRUD operations for fee records with secure admin authentication
- Implemented payment tracking, due-date alerts, and downloadable receipts
- Used Python (Flask) backend with SQL database for data persistence

Try Your Prime (2026) [GitHub](#) | [Live Server](#)

AI-powered conversational assessment tool that analyzes user habits and predicts future trajectory

- Behavioral Projection Engine where AI meets self-assessment.
- Built a full-stack application using FastAPI (Python) backend with Groq API integration for LLM processing

CERTIFICATIONS & TRAINING

- Frontend Web Designing (HTML5, CSS3 & UI/UX) - freeCodeCamp
- Python Full-Stack - Internship (EduSkills)
- Machine Learning: Statistical Foundations (Wolfram Research)
- AI Internship (CodSoft)
- Artificial Intelligence Foundations: Machine Learning
- C Programming Language (Codetantra)
- Machine Learning & Data Science - Internship (EduSkills)
