SUMMARY

Third-year Computer Science undergraduate with hands-on experience building and deploying full-stack web applications, RESTful APIs, and interactive client-side platforms using Python and JavaScript. Experienced in developing production-ready applications with LLM API integration, real-time communication, responsive interfaces, and modern backend architectures. Seeking software engineering, backend, or AI/ML internship opportunities where I can contribute to real-world products and strengthen my engineering expertise.

EDUCATION

Balaji Institute of Technology and Science

B.Tech in Computer Science (Data Science) — CGPA: 7.89

Expected Graduation: 2028

Core Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, System Design

Warangal, TG
July 2024 – Present

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), Java, SQL

Backend & APIs: FastAPI, Flask, RESTful APIs, WebSockets, JWT Authentication, SQLAlchemy

Frontend: HTML5, CSS3, Bootstrap 5, DOM Manipulation, Responsive Design

AI/ML: Groq API, LLM API Integration, Prompt Engineering

Databases & Tools: SQLite, MySQL, Git, GitHub, Vercel, Render, VS Code, Linux CLI

Core CS Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Systems (DBMS), System Design Principles

PROJECTS

Typora | HTML5, CSS3, JavaScript

[GitHub](#) [Live Demo](#)

- Built a browser-based typing precision challenge with real-time WPM and accuracy tracking using JavaScript event handling and dynamic DOM updates.
- Implemented client-side state management and keyboard event handling to render live performance metrics.

MindCraft | JavaScript, Groq LLM API, HTML5, CSS3, Vercel

[GitHub](#) [Live Demo](#)

- Built and deployed an LLM-powered topic discovery platform using the Groq API for dynamic topic exploration based on user interactions.
- Implemented client-side state management for randomized topic selection, Quickfire/Investigate modes, and asynchronous API responses.

TryYourPrime (TYP) | Python, FastAPI, Groq LLM API, Vercel

[GitHub](#) [Live Demo](#)

- Built an AI-driven conversational self-assessment application using FastAPI and the Groq LLM API to generate personalized responses from structured user inputs.
- Designed RESTful backend endpoints for multi-turn conversational workflows while maintaining stateless server-side request handling.

Blundrr | Python, FastAPI, JavaScript, WebSockets, SQLite, Stockfish Engine

[GitHub](#)

- Built a full-stack chess analysis platform using FastAPI, JavaScript, and Stockfish, with engine execution isolated in a browser Web Worker for responsive client-side processing.
- Developed WebSocket-based real-time communication with JWT authentication and bcrypt password hashing for secure user sessions.

Fee Management System | Python, FastAPI, SQLAlchemy, SQLite

[GitHub](#)

- Built a FastAPI-based student fee management system supporting fee tracking, automated due-date alerts, and PDF receipt generation.
- Implemented CRUD workflows, admin authentication, and parameterized SQLAlchemy queries to improve data integrity and mitigate SQL injection risks.

CERTIFICATIONS & ACHIEVEMENTS

AI, ML & Data Science: Machine Learning Statistical Foundations (Wolfram), AI Foundations, CodSoft AI - Internship, ML & DS Virtual Internship, Data Analytics with Python & Power BI

Web Development: Python Full-Stack Virtual Internship, FrontEnd Web Designing (freeCodeCamp)

Core CS & Programming: CRT – C Programming, Code Unnati (DSA, DBMS, OOP) – Edunet Foundation
